There was, however, no material recovery, and lower prices were marked in some of the specialties hitherto untouched by the downward movement. The Western "bears" are still harping upon poor crops, while the local contingent lays particular stress upon the real or apparent scarcity of money, and argues that, notwithstanding the advance in the price which the Secretary is willing to pay for bonds, the first offerings of over \$10,000,000 seem to have exhausted the supply, and the absorption of money by the Treasury still continues. In addition there is the drain to the interior beginning to be felt again, while high rates for money in London are drawing gold from this side. The "bulls," on the other hand, deny that the bank reserves justify ruling rates, let alone the extreme rates which have been exacted during the past two days on the spurts and accusations of manipulation are freely made against a few institutions who were some time ago prominent in manipulating the rates for money on call. While the market is falling the short interest increases, and when the Treasury begins to issue the new silver-dollar notes the monetary manipulation would, in all probability, cease. At that time, also, there is likely to be a better demand for securities and less apathy in a speculative way upon the bull side. There was no lack of effort to get the market down further in the forenoon, but it met with such vigorous resistance that it was soon given up, and when that happened the market returned to its old condi-tion of dullness, with slowly appreciating values. First prices were higher than last night's figures, and there was some buying for London account, beside evident efforts by the Chicago sellers of the past few days to recoup. There was less stress laid upon the shortage of the crops, therefore, and the news from that section was of a more hopeful character. The local contingent, however, was active in depressing prices. and the market was given an irregular and feverish tone which lasted throughout the day. There was little effect, however, except in some of the specialties, like Tennessee Coal, Chicago Gas and Chesapeake & Ohio first preferred. The first named, in the absence of support, was offered down from 48½ to 42, and quickly rallied to 47, closing at 46. Sugar was sold down in the early dealings, but later recovered about all of the loss. Pressure was severe upon Atchison, Missouri Pacific and St. Paul, but neither suffered particularly. The market, after the attacks were over, always sank back into the usual

TRADING AT CHICAGO.

Wheat, Corn and Oats All Lower-Hog

Products Easier. CHICAGO, Aug. 7 .- In wheat an easier feeling existed to-day and the advance of yesterday was lost. The market was governed mainly by speculative influence. The Northwest was reported as selling, and foreigners also sold for future delivery. The market opened about the same as yesterday's closing to a shade less, but became weak, and prices declined, with only slight fluctuations, 112@15sc for September and 12c for December, rallied slightly, prices advancing 12c, again eased off, declining 11sc, and closed about 15s@13tc lower than yesterday's closing figures. A good general speculative trade was witnessed in the corn market. The feeling prevailing was a little unsettled. the market ruling firm early but easier as the day advanced. A prominent railroad official states that corn in lowa and Illinois and generally west of the Missouri river will be a fair crop; eastern half of Kansas and Nebraska will be very moderate, and western half of these States practically nothing. The Cincinnati Price Current estimates the crop at 1,600,000,000, or about 500,000,000 short of last year. The market opened 34@114c better than the closing prices of yesterday, was firm for a time, then ruled easier and prices receded 238@212c; rallied some, ruled steady and closed 58@34c lower than yesterday. Oats were fairly active, but weaker and lower, but exhibited more steadiness than on yes-terday. The opening was unsettled and 14@34c higher. A weaker feeling developed and was increased by the decline in wheat and corn, and prices receded 1@15sc from the highest figures, but rallied slightly, and the market closed steady at nearly inside prices and 1800 loc lower than yester day. In mess pork a fairly active trade was reported. Sales were made at 20@25c advance at the opening, but later in the day a gradual reduction of 50@55c was submitted to. Toward the close prices rallied 5@10c and the market closed quiet. The demand for lard was active early, and prices ruled .0212@.05c higher, but was followed by a decline of .15@.20c. Near the close prices rallied slightly, but the market closed quiet. The short-rib demand was quite active early, and sales were made at .10@.1212c advance in prices. A reduction of .2212@.25c followed; the market rallied | firm, but scarce. Eggs firm at 1612@17c. | Hogs dull and heavy. Receipts, 21 car-

INDIANAPOLIS MARKETS.

Trade Healthy in Its Volume, with but Few Changes in Values.

INDIANAPOLIS, Aug. 7. There is but little that is new which can be said as regards the local business situation. In most departments there is more doing than at the corresponding period last year, and the opinion prevails among business men that there is to be a good fall trade. So far as prices are concerned, in nearly all lines the range is higher than usual coming into the fall months. Especially is this true as regards fruits and vegetables-in fact, all lines of produce, the dry weather in much of the territory from which this market is supplied, doubtless, being the chief cause. Potatoes and tomatoes both carry an easy tone with the increasing receipts. Apples are s till scarce, and good fruit high. The grocers are experiencing a good trade, and, except on sugars, no fluctuation in prices is shown, and prices in this staple are firmer. The flour market is getting in much better shape, and the millers talk bultish as to the future of the market. They say, however, that it is high time that they had a show, as they have been running most of the time the last two years at a loss. The hide men, as well, are much encouraged over the outlook, and they, too, now have some show to make some money in the business. Other markets are without feature.

Receipts are falling off. It is stated that farmers are putting their wheat and oats in bins to hold them for better prices, expecting an early improvement in prices, so unpromising is the corn crop in many sections. Track bids to-day ruled as follows: Wheat—No. 2 red, 92c; No. 3 red, 87½c; rejected, 75c; unmerchantable, 60@70c.

Body Cleanliness.

It is not only true that the human body is "fearfully and wonderfully made," but that, particle by particle, it is constantly being worn out, our exercise daily destroying portions of the bones, muscles, nerves and every portion, these particles being as truly putrescent as the body will ever become after the breathing ceases. These effete, putrid and more or less poisonous matters are secreted, thrown into the blood, carried into the lungs for purification, the carbonaceous portions combining with the oxygen of the inspired air, producing as actual combustion as when the air feeds the flame in the furnace, the carbon of the wood and coal combining with the same oxygen, heat being the result in both cases, the heat of the body being kept at about 98° Fab. in all climates, this being the most prominent object of breathing. The skin is the constituted partner of the lungs in this grand work of purification; other portions of this effete matter being taken up, almost miraculously, emptied into about twenty-eight miles of tubing, more or less minute, to the extent of more than one-half of all that enters into all the stomach, solid and liquid, gathered up from all parts of the system, carried to the surface, and flowing on through seven millions of outlets, called pores, thus preventing blood-poisoning.

This self-purification is going on while we are asleep or awake, independently of our volitions, the breathing and the perspira-tion being increased by our activity, the waste of the tissues being correspondingly increased, which is compensated for by an increase of the appetite, demanding a pro-portionate amount of food, repairing this waste of the body by physical and mental exercise. This food is wonderfully transformed into red blood—whatever the color or quality of the food—from which every tissue of the body is made, supplying growth and repairing waste. In this grand work of reconstruction, repairing the results of this waste, the blood circulates to the remotest parts of the body, carrying the needed materials, the bone material, for example, being deposited just where it is needed, directed by an unseen power. The same is true of every tissue of the body. This blood is filled with innumerable living and moving creatures, whose duty it is to superintend these repairs, etc. Millions of them are created almost in an instant in case of a severe accident demanding their services, while immense numbers of them die at every breath, when their services are no longer needed.

THE

DAILY, SUNDAY and WEEKLY

The Most Complete Newspaper in all Departments in the State of Indiana.

No newspaper in the West is more widely or more favorably known than the Indianapolis Journal. By the display of enterprise and strict attention to the wants of the reading public, during the great campaign of 1888, it has taken a leading position among the most prominent journals of the country, and is certainly among the best. Among the newspapers of the State it is pre-eminently the best, and Indiana readers can nowhere else find what they want in the way of State and local news. It circulates largely in every county in Indiana, and has correspondents in every town and village of importance. Its market reports are prepared with the greatest care possible, and no pains or expense are spared to make them accurate and absolutely reliable. It is the only newspaper in the State owning and publishing all the news furnished by the two great press associations (the Western Associated Press and the United Press). in addition to which it furnishes an abundance of special service from all the principal cities of the country. It has been, and will in future be, the aim of the publishers to make the Indianapolis Journal a perfect and complete newspaper, deficient in no department or particular. The paper challenges comparison with any of its contempo-

No Indiana reader, certainly no Indiana Republican, should be without the Journal. While it is thoroughly and soundly Republican in politics, devoted to the interests of the Republican party. the Journal will not allow its news to be colored by partisan bias, but will give the news of the day without fear or

Owing to the prominence of Indiana in the national administration, the Journal gives particular attention, to Washington news, which will be given far more completely than ever before. For this reason, if for no other, no Indiana reader can afford to be without it for the

next four years. In addition to its new features, the Journal regales its readers with the productions of some of the best known literary men and women of the day. Many of the most celebrated magazine writers and authors are contributors to its literary columns, making it a paper for the household and home circle. Special arrangements have been made for features of this character, which will appear in the Journal during the coming year. These appear most largely in the SUNDAY JOURNAL, which is a special edition, and can be subscribed for and received exclusive of the DAILY JOURNAL.
